

Dear residents and families,

We are pleased to inform you that all team members considered close contacts have returned negative PCR tests. Therefore, under the Department of Health guidelines, these team members have returned to work with daily rapid antigen testing.

We thank them and the wider team for ensuring they enacted the correct procedures immediately.

We continue to support the fully vaccinated positive team member as they continue to isolate.

This is a great example shown by our team of the importance to immediately isolate and get tested the moment you experience any symptom, no matter how minor.

We are grateful to our residents, clients and families for their understanding and support of the actions taken to keep the Lyndoch and broader community COVIDSafe.

It is a timely reminder that we all need to remain vigilant by following COVIDSafe practices across our homes and within our community.

May you and your family stay healthy and safe.

Kind regards,

Doreen Power
CEO
